- An environmentally friendly alternative to plastic snow
- Coverage: each 5kg box will cover approx. 50m at 1cm depth.
- Each 5kg bag will fill a JBL Snowglobe

ECO SNOW IS A TRADITIONAL, WHITE FLAKE, BRIGHT AND WHITE. ECO ARTIFICIAL SNOW IS PERFECT AS FALLING SNOW & DRESSING SNOW FOR THEATRES, STAGE PRODUCTIONS, PANTOMIMES, FILM, TV, HOTELS, RETAIL WINDOW DISPLAYS, GARDEN CENTRES & JBL SNOW GLOBES.

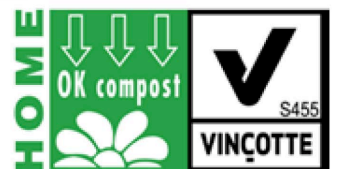

Light and easily introduced using any air/blower moving device or dropped from above, Eco Snow is versatile and simple to use.

Use this artificial snow for setting a scene. Perfect for use as dressed snow or falling snow.

Eco Snow is PLA (Polylactic Acid) based - which means it's made from renewable resources, in this case non-GMO corn. PLA is an alternative to traditional petroleum-based plastic fake snow.

We're the company that designed, patented and manufacture the world famous JBL Snow Globes, we have been constantly striving for artificial snow that falls as gently on the earth as the real thing.
